Insect Shield Screens

FlyDoor Retractable Fly Screens

FlyDoor - retractable fly-screen doors is suitable for wide opening doors such as alfresco areas, bi-fold doors, French doors and single panel casement doors. It can be used even around patio/veranda area. The sliding guide is only 2mm in height which does not obstruct like wheelchair access etc.

Why FlyDoor Retractable Fly Screens

- Easy to use and does not obscure the view when retracted.
- Can be dismantled and stored away during winter.
- Custom made- built to exact size and matching colors.
- Elegant and stylish look blends in with your home.
- Supplied and installed by qualified installers.
- FlyDoor- insect screens manufactured in India.

Rolling Fly Mesh System

The roller blind mesh fly screen is an unobtrusive method of keeping flies out of your home or business. When your window is closed the roller blind mesh fly screen is discreetly retracted into the top cassette. When you want to open your window you simply pull down the mesh flyscreen and lock it into position.

Why Rolling Fly Mesh System

- Retractable fly screens solve lots of problems, they stop flying insects just like fixed screens, but can be fully retracted when not in use allowing you full flexibility, especially in winter.
- The screens are easy to install and form a fully sealed unit to the window frame or reveal. The mesh is a grey decor mesh and is easily cleaned by simply vacuuming.
- All the casings are polyester coated aluminium which give strength and durability, anti-chipping and scratching.
- The screens are suitable for both commercial and residential use and can be installed inside or outside and are rust free.

Techno Ceiling Products

Techno Ceiling Products is India's leading manufacturer of Metal False Ceiling industry promoted by experience and dynamic professionals in the industry. Techno modular T-Grid system is a technological breakthrough as compare to traditional aluminium fabricated system. Techno Acoustic™, Metal Ceiling tiles are made of GI, Aluminum and stainless in various configurations, perforations and finishes that can give best solutions for Ceiling.

Modern Kitchen

When discovering kitchen remodeling ideas for your kitchen, there are several different aspects to consider. Overall, a functional space is key — after all, you want your kitchen layout to work well for you. You should carefully consider where to place your stove, refrigerator, island and cabinets to ensure plenty of space to cook, eat and entertain. Finally, your modern space should look nice and welcoming to guests who visit. Using high-quality, colorful materials will help bring personality and vibrancy to your space, which is important when trying to avoid a cookie-cutter look.

“A Kitchen must be your magic world”

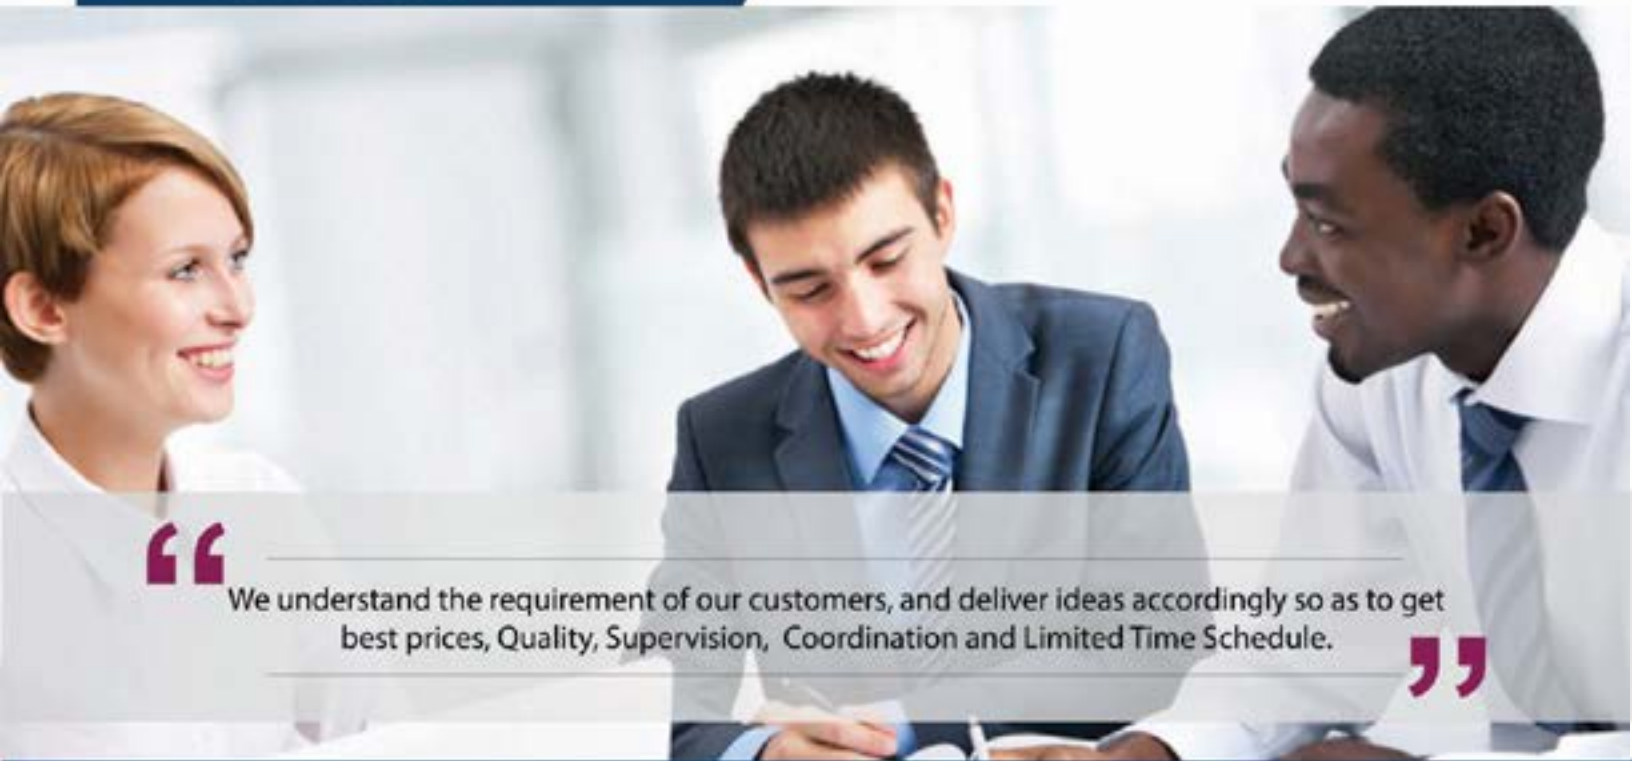

Aluminium Compactor Storage System

Compactor Storage Systems requires lesser space and provides more storage in comparison to than conventional racking systems. With the help of compactor storage system you can save upto 60% of your space or can consume up to 100% of your storage area.

- Applicability
- Offices- stores computer peripherals, documents, files and acts as record room.
- Godowns/Factories- It helps store costly components and other material parts which require protection from dust, seepage and contamination.
- Hospitals/Labs- It provides a professional methodology to maintain customer records with easy identification and categorization.
- Showrooms- It is not just a storage unit but also provides pleasant look and feel to the area.
- Hospitals/Labs- It provides a professional methodology to maintain customer records with easy identification and categorization.
- House hold storage in Kitchen
