- * 1200 mm x 600 mm Grid Falce Ceiling

Insect Shield Screens

FlyDoor Retractable Fly Screens

FlyDoor - retractable fly-screen doors is suitable for wide opening doors such as alfresco areas, bi-fold doors, French doors and single panel casement doors. It can be used even around patio/veranda area. The sliding guide is only 2mm in height which does not obstruct like wheelchair access etc.

Why FlyDoor Retractable Fly Screens

- Easy to use and does not obscure the view when retracted.
- Can be dismantled and stored away during winter.
- Custom made- built to exact size and matching colors.
- Elegant and stylish look blends in with your home.
- Supplied and installed by qualified installers.
- FlyDoor- insect screens manufactured in India.

Rolling Fly Mesh System

The roller blind mesh fly screen is an unobtrusive method of keeping flies out of your home or business. When your window is closed the roller blind mesh fly screen is discreetly retracted into the top cassette. When you want to open your window you simply pull down the mesh flyscreen and lock it into position.

Why Rolling Fly Mesh System

- Retractable fly screens solve lots of problems, they stop flying insects just like fixed screens, but can be fully retracted when not in use allowing you full flexibility, especially in winter.
- The screens are easy to install and form a fully sealed unit to the window frame or reveal. The mesh is a grey decor mesh and is easily cleaned by simply vacuuming.
- All the casings are polyester coated aluminium which give strength and durability, anti-chipping and scratching.
- The screens are suitable for both commercial and residential use and can be installed inside or outside and are rust free.

5 mm to 18 mm
